## F00RJ02410 Injection Valve Set Technical File

#### 1. F00RJ02410 Injection Valve Set Introduction

The injection valve set is a critical component of the injector system, comprising the valve stem and valve cap. It is housed in the control room within the injector body and plays a pivotal role in controlling oil injection and return. This set is not only a core component but also prone to high damage rates.

**Valve Cap Inspection:** Use a microscope to inspect the contact surface between the valve cap and the ball for any signs of damage. If damage is detected, the valve cap should be replaced promptly.

#### **Valve Stem Inspection:**

Top of Valve Stem: Examine the top of the valve stem for any surface damage. A change in the original silver color to white indicates damage, necessitating a replacement.

Contact Area with Injector: Similarly, inspect the valve stem's contact area with the injector for surface damage. Any change from the original silver color to white indicates the need for replacement.

#### 1.1. FOORJO2410 Injection Valve Set Basic Information

| Title | F00RJ02410 Injection Valve Set China Made New |

#### 3) F00RJ02410 Injection Valve Set Part Number Common Writing

F00RJ02410, F00RJ02410, F 00R J02 410, F OOR J02 410, F00R J02 410, F00R J02 410, F00RJ02 410, F00RJ02 410, F 00R J02410, F 00R J02410, F 00R J02410, F 00R J02410, F00R J02410, F00R J02410

#### 1.3. F00RJ02410 Injection Valve Set Specifications and Dimensions Parameters

Injection Valve Set Size: 13 cm\*2 cm \*2 cm
Injection Valve Set Box Size: 14 cm \*3 cm \*3 cm

Injection Valve Set Packing Size: 31 cm \*12 cm

Injection Valve Set Net Weight: 0.03kg
Injection Valve Set Gross Weight: 0.03kg
Injection Valve Set Quality: China Made New

Injection Valve Set MOQ: 4PC

#### 1.4. F00RJ02410 Injection Valve Set Quality Control

#### 1) Injection Valve Set Testing

All parts of the injection valve set have undergone precision testing, high temperature testing, low temperature testing, withstand pressure testing, leakage testing, durability testing, and various working conditions testing.

#### 2) Injection Valve Set Inspection

The factory inspection of the injection valve set is undergone three inspections: full inspection, random inspection, and batch inspection. Different brands of test benches are used to test the same injection valve set for more than three times for factory inspection, and the injection valve set 's installation and testing environment are progressed in dust-free workshop.

#### 3) Injection Valve Set Installation

When matching the valve cap and valve steam, Shumatt strictly complies with the standard of valve cap and valve stem clearance technical indicators to ensure that each injection valve set meets the factory standards and use standards.

#### 1.5. F00RJ02410 Injection Valve Set Customized Service

Website: www.injectionvalveset.com

1) Injection Valve Set Customized Service Coverage: Meet the customized needs of OEM manufacturers for valve color and lustre, valve cap groove customization, valve cap lettering ,valve cap logo engraving, valve cap QR code engraving, injection valve set internal packaging, injection valve set external packaging and label customization needs.

#### 2) Injection Valve Set Customized Service Requirements:

The purchase of customized injection valve set package is no less than 100 pieces.

The purchase of customized valve set groove is no less than 100 pieces.

The purchase of customized valve set is no less than 1000 pieces.

The purchase of customized valve cap engraving is no less than 1000 pieces.

The purchase of customized valve color is no less than between 1000 -10000 pieces.

▲ When the customized Service involve the need of specify logo, the OEM manufacturer is asked to provide trademark authorization and the sample of logo image file.

• Once the customized injection valve set is sold, it can not be returned or exchanged if there is no quality problems.

| Description | Prevent the injection valve set from rusting                    | /   |

A Minors are prohibited from using the injection valve set, valve set anti-rust paper, valve

assembly box, and VCI anti-rust bag to avoid personal injury.

The Valve Set box is recyclable and can be reused.

VCI anti-rust bag is non-degradable material, please dispose of it properly after use.

#### 1.7. FOORJO2410 Injection Valve Set Warranty Instructions

#### **Injection Valve Set Warranty Conditions and Instructions**

It is necessary to provide pictures, videos, or test reports detected by the injection valve set inspection equipment when the valve set is abnormal during use as evidence to feed back to the salesman.

Abnormal conditions are properly explained such as:1. Smoke, 2. Engine shake, 3. Difficulty starting the engine, 4. Engine noise, 5.0il leakage and other abnormal conditions.

The above condition may also be affected by other components of the injector. If it is confirmed by our company to be a product problem, it is within the scope of the subsidy.

#### **Injection Valve Set Warranty Coverage**

Within 15 days after customer receives the FOORJO2410 injection valve set, if there is a performance failure and the product has no appearance damage, customer can choose to replace it;

If theF00RJ02410 injection valve set has performance problems during the warranty period (6-12 months), and it is confirmed that it is product's problems after being tested, you can contact our salesmen to replace the same model for free;

If the product is confirmed to be fault-free, the product will be returned.

#### 3) Injection Valve Set Out of Warranty Coverage

- ① The warranty period has expired, not covered by warranty.
- ② Injection valve set failure caused by high temperature, high pressure, humidity, rain and snow, saline-alkali land, earthquake, and used in abnormal environment.
- ③ Injection valve set damage caused by man-made reasons (throwing, strong magnetic field magnetization, set fire).
- Injection valve set failure or injector damage caused by non-injector design, technology, manufacturing, quality and other issues.
  - ⑤ Injection valve set failure due to system pressure exceeding system approved pressure.
- Injection valve set failure caused by impurities (water, lead, aluminum powder, iron powder, sulfide) in the system fuel exceeding the standard requirements.
- Injection valve set failure caused by not installing according to the tightening torque specified in the vehicle engine maintenance manual (the tightening torque is too large or too small).
- 8 Injection valve set failure caused by not following the installation angle specified in the injector maintenance manual.
- Injection valve set failure caused by not following the cleaning requirements specified in the injector maintenance manual.
- Injection valve set failure caused by failure to replace consumable parts as specified in the injector maintenance manual.

#### 1.8. FOORJO2410 Injection Valve Set Storage Standard

#### **Choose a Suitable Storage Place**

The warehouse and cargo yard where the fuel injection valve set is stored should be kept clean and dry, and away from the factory buildings that generate harmful gases and dust; do not mix with acid, alkali, salt and other substances; the storage place should have a good drainage system; the cargo yard should be flattened with gravel or furnace ash etc. to enhance the water permeability of the surface layer to keep the reservoir area dry.

#### **Strict Requirements of Warehousing**

Strict inspections should be carried out when the fuel injector valve assemblies are put into storage, the surface cleaning work should be done well to remove water traces, oil stains, ash and other dirt, remove the rust and do anti-rust treatment in time. Packaged injection valve set must be protected from damage.

#### **Keep The Warehouse Dry And Preventing Moisture**

The relative humidity is usually below 70% for the fuel injector Valve Set placed in the room, and the

corrosion of the fuel injection valve set is significantly reduced.

Injection valve set must be stored in the warehouse, and they are forbidden to store in the same warehouse with commodities with high water content.

#### 4) Stack Properly

After the injection valve set is exposed to rain, the corrosion rate will increase significantly. The purpose of sealing is to isolate the injection valve set from rainwater and humid air, so the warehouse window should be checked in time to avoid rainwater entering the warehouse

If the injection valve set package is damaged, it should be repaired or replaced; when the package is damp, the packaging material should be dried; if the original anti-corrosion and oil applied at the factory is found to be damaged or dried up, it should be cleaned and re-applied oil in time.

⚠ It is forbidden to leave the injection valve set exposed in the air for a long time.

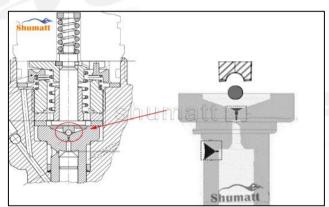

▲ It is forbidden to store acid, alkali, salt and other substances together with the injection valve set.

The unpacked injection valve set must be rust-proof during secondary storage.

#### 2. F00RJ02410 Injection Valve Set Technical Support

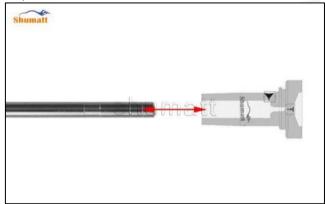

#### 2.1. FOORJO2410 Injection Valve Set Installation Precautions

- 1) Clean the injection valve set in an ultrasonic cleaner for 3-5 minutes before installation, so as to make the stains, dust, rust-proof oil oxides, paraffin base, naphthenic base, intermediate base, salt, lead naphthenate, zinc naphthenate, sodium petroleum sulfonate, barium petroleum sulfonate, calcium petroleum sulfonate, tallow diamine trioleate, rosinamine on the surface of the injection valve set fall off.
- Use compressed air to clean the cleaning fluid attached to the surface of the injection valve set after cleaning, and clean it up to the standard of use.
- 3) When installing the steel ball and ball seat, pay attention to the steel ball should close tightly to the oil return hole at the top of the valve cap, as shown below:

Pic No.1

4) When installing the valve stem, make sure that the valve stem and the bonnet must ensure that the valve stem can move smoothly in it, as shown below:

Pic No.2

5) When installing the injection valve set, the oil inlet position should be 180° between the oil inlet

position of the injector body.

If the injector steel ball and the ball seat are not installed in accordance with the standard, it may cause serious damage to the injection valve set.

#### 2.2. F00RJ02410 Injection Valve Set Replacement Conditions

#### 1) Valve Cap

Under the microscope, magnify 20 times to check that the oil inlet hole of the valve cap and the oil return hole of the bonnet are not worn, grooved, scratched, damaged, rusted or dented.

| No.         | 1   | 2   | 3   |
|-------------|---|---|---|
| Image       |   |   |   |
| Description | Injection valve cap oil inlet hole location                           | Injection valve cap oil return hole location                      | The oil inlet and oil return holes of the injection valve cap are free of wear, grooves, scratches, damage, rust, dents, which do not need to be replaced |
| No.         | 4   | 5   | 6   |
| Image       |   | 0   |   |
| Description | The injection valve cap oil hole is recessed and needs to be replaced | The injection valve cap oil hole is worn and needs to be replaced | The injection valve cap oil hole is punched and needs to be replaced  |

⚠ The wear of the top oil return hole causes the oil return to be too large and the leaking injector cannot inject oil.

The oil inlet hole on the side is blocked, causing the injector to fail to establish the pressure chamber and the injector cannot work normally

Wear of the oil chamber of the valve cap will cause fuel injector failure. In severe cases, the fuel injector will not work properly.

#### 2) Valve Stem

Magnify 20 times under a microscope to check whether the valve stem is worn, the surface is not smooth, discolored, or rusty.

| No.         | 1   | 2   | 3  |
|-------------|---|---|--|
| Image       |   |   |  |
| Description | The valve stem is worn out and needs to be replaced | The valve stem surface is not smooth and colorless, and it needs to be replaced | The valve stem is rusty and needs to be replaced |

The excessive clearance between the valve stem wear, housing and the valve cap will causes injector lag.

 $oldsymbol{\mathbb{A}}$  The valve stem lag will cause the injector to start the solenoid to start, and the oil needle can not return quickly after the nozzle is opened.

A Check the injector components before replacing the injection valve set according following the injector service manual to avoid further damage to the injection valve set after replacement.

#### 2.3. FOORJO2410 Injection Valve Set Technical Support Obtaining Methods

- Injection Valve Set Encyclopedia: https://www.injectionvalveset.com/category/news/encyclopedia/

#### 3. F00RJ02410 Injection Valve Set Purchase and Delivery.

#### 3.1. FOORJO2410 Injection Valve Set Purchase Payment Terms

Payment Terms: T/T, PayPal, Alipay, WeChat

A Please contact our salesmen for specific payment information.

#### 3.2. FOORJO2410 Injection Valve Set Main Sales Market.

**Injection Valve Set main sales markets:** Asia, Europe, North America, South America, Africa etc.

#### 3.3. FOORJO2410 Injection Valve Set Declaration Requirements

We can assist customers to provide the following documents for import customs clearance: contract invoice, packing list, bill of lading, insurance policy, certificate of origin, etc.

#### 3.4. FOORJO2410 Injection Valve Set Shipping Ways

**Destination in China areas:** SF Express, Debon Express, the corresponding logistics company can be provided according to customer requirements in special cases.

**Destinations out of China's areas:** DHL, UPS, FedEx, TNT air, ocean or other shipping methods required by customers.

#### 3.5. FOORJO2410 Injection Valve Set Lead Time

Lead time: Send out within 3 - 7 working days after receiving payment(Except for special products and special cases).

#### 3.6. FOORJO2410 Injection Valve Set Logistics Time for Destination Out of China's Areas **DHL Logistics Time:**

#### 3.7. FOORJO2410 Injection Valve Set Packing

Domestic Express Packaging: Usually wrapped in waterproof scotch tape, such as picture No.1. International Express Packaging: Wrapped with waterproof yellow tape After wrapping the black protective

film, such as picture No. 2.

Pallet Shipping: Use fumigation free and recycling trays that meet export requirements, and use white wrapping protective film to wrap and bind with cable ties for the outside, such as picture No. 3, Also, the products can be packaged according to customers' requirements.

⚠ The packing tray is made of plastic and can be recycled.

A Transparent tape, yellow tape, black wrapping protective film, white wrapping protective film are non-degradable materials, please dispose of them properly.

⚠ Minors are prohibited from using transparent tape, yellow tape, black wrapping protective film, and white wrapping protective film to avoid personal injury.
